Oracle Database 19c: Administration Training

Course Content

Introduction to Oracle Database

- Oracle Database Server Architecture: Overview
- Oracle Multitenant Container Database: Introduction
- Oracle Multitenant Container Database: Architecture
- Oracle Database Instance Configurations
- Summary

Accessing an Oracle Database

- Connecting to an Oracle Database Instance
- Oracle Database Tools
- SQL*Plus
- Oracle SQL Developer
- Oracle PLSQL Developer
- Database Configuration Assistant (DBCA)
- Enterprise Manager Cloud Control 13c Features
- Oracle Enterprise Manager Database Management
- Summary

Creating an Oracle Database by Using DBCA

- Planning the Database
- Choosing the Appropriate Character Set
- Using the Database Configuration Assistant
- Using DBCA in Silent Mode
- Summary
- Practice Overview

Starting Up and Shutting Down a Database Instance

- Starting the Oracle Database Instance
- Shutting Down an Oracle Database Instance
- Comparing SHUTDOWN Modes
- Opening and Closing PDBs
- Configuring PDBs to Automatically Open
- Summary
- Practice Overview

Managing Database Instances

- Working with Initialization Parameters
- Initialization Parameters
- Modifying Initialization Parameters

- Viewing Initialization Parameters
- Working with the Automatic Diagnostic Repository
- Automatic Diagnostic Repository
- Viewing the Alert Log
- Using Trace Files
- Querying Dynamic Performance Views
- Considerations for Dynamic Performance Views
- Data Dictionary: Overview
- Querying the Oracle Data Dictionary
- Summary
- Practice Overview

Oracle Net Services: Overview

- Connecting to the Database Instance
- Oracle Net Services: Overview
- Defining Oracle Net Services Components
- Tools for Configuring and Managing Oracle Net Services
- Oracle Net Listener: Overview
- The Default Listener
- Comparing Dedicated and Shared Server Architecture
- Summary

Configuring and Administering the Listener

- Review: Oracle Net Services Overview
- Oracle Net Listener: Overview
- The Default Listener
- Configuring Dynamic Service Registration
- Configuring Static Service Registration
- Summary
- Practice Overview

Creating PDBs from Seed

- Provisioning New Pluggable Databases
- Tools
- Creating a New PDB from PDB$SEED
- Using the FILE_NAME_CONVERT Clause
- Using OMF or the PDB_FILE_NAME_CONVERT Parameter
- Summary
- Practice Overview

Using Other Techniques to Create PDBs

- Cloning Regular PDBs
- Migrating Data from a Non-CDB into a CDB
- Using DBCA to Clone a Remote PDB
- Plugging an Unplugged Regular PDB into CDB
- Cloning Remote PDBs in Hot Mode
- Using DBCA to Relocate a Remote PDB
- Summary

Managing PDBs

- Changing the PDB Mode
- Modifying PDB Settings
- Impact of Changing Initialization Parameters
- Changing Initialization Parameters: Example
- Using the ALTER SYSTEM Command in a PDB
- Configuring Host Name and Port Number per PDB
- Dropping PDBs
- Summary
- Practice Overview

Database Storage Overview

- Database Storage Architecture
- Logical and Physical Database Structures
- Segments, Extents, and Blocks
- Tablespaces and Data Files
- Default Tablespaces in a Multitenant Container Database
- SYSTEM and SYSAUX Tablespaces
- Types of Segments
- Monitoring Tablespace Space Usage
- Oracle Database Storage Structures: Interactive Architecture Diagram
- Summary

Creating and Managing Tablespaces

- Creating Tablespaces
- Temporary Tablespaces
- Altering and Dropping Tablespaces
- Viewing Tablespace Information
- Implementing Oracle Managed Files (OMF)
- Enlarging the Database
- Moving or Renaming Online Data Files
- Summary
- Practice Overview

Managing Undo Data

- Undo Data: Overview
- Transactions and Undo Data
- Storing Undo Information
- Comparing Undo Data and Redo Data
- Configuring Undo Retention
- Categories of Undo
- Guaranteeing Undo Retention
- Summary
- Practice Overview

Creating and Managing User Accounts

- Database User Accounts
- Oracle-Supplied Administrator Accounts
- Creating Oracle Database Users in a Multitenant Environment
- Creating Common Users in the CDB and PDBs
- Creating Schema Only Accounts
- Assigning Quotas
- Summary
- Practice Overview

Configuring Privilege and Role Authorization

- Privileges
- System Privileges
- System Privileges for Administrators
- Object Privileges
- Granting Privileges in a Multitenant Environment
- Using Roles to Manage Privileges
- Assigning Privileges to Roles and Assigning Roles to Users
- Oracle-Supplied Roles
- Granting Roles in a Multitenant Environment
- Making Roles More Secure
- Revoking Roles and Privileges
- Granting and Revoking System Privileges
- Granting and Revoking Object Privileges
- Summary
- Practice Overview

Configuring User Resource Limits

- Profiles and Users
- Creating Profiles in a Multitenant Architecture
- Profile Parameters: Resources
- Profile Parameters: Locking and Passwords
- Oracle-Supplied Password Verification Functions
- Assigning Profiles in a Multitenant Architecture

- Summary
- Practice Overview

Transporting Data

- Data Pump Export and Import Clients
- Data Pump Interfaces and Modes
- Data Pump Import Transformations
- Using Oracle Data Pump with PDBs
- Exporting from a Non-CDB and Importing into a PDB
- Exporting and Importing Between PDBs
- Using RMAN to Transport Data Across Platforms
- Summary
- Practice Overview

Database Monitoring and Tuning Performance Overview

- Objectives
- Performance Planning Considerations
- Database Maintenance
- Automatic Workload Repository (AWR)
- Automatic Database Diagnostic Monitor (ADDM)
- Configuring Automatic ADDM Analysis at the PDB Level
- Performance Tuning Methodology
- Summary

Monitoring Database Performance

- Server-Generated Alerts
- Setting Metric Thresholds
- Reacting to Alerts
- Alert Types and Clearing Alerts
- Database Server Statistics and Metrics
- Performance Monitoring
- Viewing Statistics Information
- Summary

Analyzing SQL

- SQL Tuning Process
- Oracle Optimizer
- SQL Tuning Advisor: Overview
- Managing Automated Tuning Tasks
- Summary
